Our Philosophy

Our approach to integrative medicine focuses upon the most natural and effective healing methods that are noninvasive, therapeutic and proven based upon Dr. Staninger's unique perspective of your individual exposures to environmental toxins and toxicogenomics. She has worked with thousands of patients over several decades as she applied her skills in applied industrial toxicology to evaluate and identify the toxins in individuals. Her experience spans academia as well as the corporate and governmental arenas. We strive to educate consumers to empower them about natural health and wellness as you move into the Temple of Beauty. All products created by Dr. Staninger are based upon both ancient and modern healing methods, are proven by solid scientific research and meet her stringent safety standards.
